

SteelBridge - Implementation Services for Ipreo's iLEVEL Platform

SteelBridge provides iLEVEL implementation expertise to help clients set proper software goals, build a plan that is achievable, and ensure teams stay engaged.

DURING Implementation

- **Program Management:** End-to-end project leadership and planning from seasoned iLEVEL implementation experts.
- **Aligned Goals:** Guidance on configuration, implementation, and data tasks ensuring the software goals are met.
- **User Adoption:** Training, support, and identification of an internal power user to foster full user adoption.
- **Project Complexity:** Experts that take the complexity out of all phases of the project to achieve software success.

AFTER Implementation

- **Full system utilization:** Leverage enhanced system features
- **Continued guidance and direction:** Provide direction on the next data to capture
- **User efficiency:** Continually improve system usage efficiency
- **Software management:** Manage the flow of data in and out of the software
